

Figure 2.2

Estimated average scores and confidence intervals for countries and provinces: Mathematics

Notes: OECD countries appear in italics. The OECD average was 490, with a standard error of 0.4.

The results of Argentina, Kazakhstan, and Malaysia are excluded because of insufficient coverage to ensure comparability (see Appendix B.2.2 for these results). Results for the province of Quebec in this table should be treated with caution because of a possible non-response bias (see Appendix A for further details).
